1034-1003.2	FOR FURTHER ACTION See paragraphs 1 and 4 below		
International application No. PCT/IB 09/51919	International filing date (day/month/year) 10 May 2009 (10.05.2009)		
Applicant AXXANA (ISRAEL) LTD.			
1. Authority have been established and are transmitted herewith. Filing of amendments and statement under Article 19: The applicant is entitled, if he so wishes, to amend the claims of the international application (see Rule 46): When? The time limit for filing such amendments is normally two months from the date of transmittal of the international search report. Wher? Directly to the International Bureau of WIPO, 34 chemin des Colombettes 1211 Geneva 20, Switzerland, Facsimile No.: +41 22 338 8270 For more detailed instructions, see the notes on the accompanying sheet. 2. The applicant is hereby notified that no international search report will be established and that the declaration under Article 17(2)(a) to that effect and the written opinion of the International Searching Authority are transmitted herewith. 3. With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that: the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices. no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made. 4. Reminders Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis. I and 90bis. 3, respectively, before the completion of the technical preparations for international publication. The applicant may submit comments on an informal basis on the written opinion of the International Searching Authority to the International Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an international preliminary examination re

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IB 09/51919

Box	No. I Basis of this opinion
1.	With regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filed. a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2.	This opinion has been established taking into account the rectification of an obvious mistake authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(a))
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, this opinion has been established on the basis of a sequence listing filed or furnished: a. (means) on paper in electronic form
	b. (time) in the international application as filed
	together with the international application in electronic form
	subsequently to this Authority for the purposes of search
4. 	In addition, in the case that more than one version or copy of a sequence listing has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
5.	Additional comments:

1. Statement			
Novelty (N)	Claims	1 - 26	YES
	Claims	None.	NO
Inventive step (IS)	Claims	None.	YES
	Claims	1 - 26	NO
Industrial applicability (IA)	Claims	1 - 26	YES
	Claims	None.	NO

Reasoned statement under Rule 43bis 1(a)(i) with regard to povelty, inventive step or industrial applicability:

2. Citations and explanations:

Box No. V

Claims 1 - 26 lack an inventive step under PCT Article 33(3) as being obvious over US 2007/0094467 A1 (Yamasaki), in view of US 2008/0104443 A1 to Akutsu et al. (hereinafter 'Akutsu').

As per claims 1 and 14, Yamasaki discloses a method (and corresponding apparatus) for data protection, comprising: in a first operational mode, sending data items for storage in a primary storage device and in a secondary storage device, while temporarily caching the data items in a disaster-proof storage unit and subsequently deleting the data items from the disaster-proof storage unit, wherein each data item is deleted from the disaster-proof storage unit upon successful storage of the data item in the secondary storage device (see para [0009]-[0010], [0052]-[0053]) but does not explicitly disclose receiving an indication of a fault related to storage of the data in the secondary storage device. Akutsu, however, discloses receiving an indication of a fault related to storage of the data in the secondary storage device (see para [00240]); and responsively to the indication, switching to operating in a second operational mode in which the data items are sent for storage at least in the primary storage device and are cached and retained in the disaster-proof storage unit irrespective of the successful storage of the data items in the secondary storage device (see para [0310]-[0316]). It would have been obvious to one of ordinary skill in the art to combine the teachings of Yamasaki with Akutsu because adding an indiction of fault for the secondary storage device introduces a valuable scenario in disaster situations which enables the proper caution and remedies to take place to ensure data protection, thus increasing the overeall appeal of Yamasaki.

As per claims 2 and 15, Akutsu further discloses wherein the data items comprise Input/Output (I/O) transactions that are received from one or more applications, and wherein operating in the second operational mode comprises continuing to receive the I/O transactions from the applications while the fault is present (see para [0079]-[0081], [0086]-[0089]).

As per claims 3 and 16, Yamasaki further discloses wherein switching to operating in the second operational mode comprises operating in the second operational mode for a predefined time duration following the indication, and switching back to the first operational mode after the predefined time duration (see para [0068], [0075]).

As per claims 4 and 17, Akutsu further discloses after switching to operating in the second operational mode, receiving a notification related to memory unavailability in the disaster-proof storage device, and performing an action responsively to the notification (see para [0094], [0467]-[0468]).

As per claims 5 and 18, Akutsu further discloses wherein performing the action comprises switching back to the first operational mode responsively to the notification (see para [0923]).

As per claims 6 and 19, Yamasaki further discloses wherein performing the action comprises prompting a user responsively to the notification (see para [0064]-[0065]).

As per claims 7 and 20, Akutsu further discloses wherein performing the action comprises selecting the action from a group of actions comprising: refusing to accept subsequent data items following the notification (see para [0155]-[0158]); and storing the subsequent data items only in the primary storage device (see para [0155]-[0158]).

As per claims 8 and 21, Akutsu further discloses wherein selecting the action comprises choosing the action responsively to a predefined configuration parameter (see para [0091]-[0092]).

As per claims 9 and 22, Yamasaki further discloses following correction of the fault, sending the data items retained in the disaster-proof storage device for storage in the secondary storage device (see para [0067]-[0070]).

As per claims 10 and 23, Akutsu further discloses wherein operating in the second operational mode comprises allowing acceptance of subsequent data items for a predefined time period following the indication, responsively to determining that the fault is associated with an unidentifiable software failure (see para [0613]-[0618]).

As per claims 11 and 24, Akutsu further discloses continuing to operate in the first operational mode irrespective of the indication responsively to determining that the fault is associated with an identifiable software failure (see para [0094], [0219]-[0224]).

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/IB 09/51919

Supplemental Box		
In case the space in any of the preceding boxes is not sufficient. Continuation of:		
V.2. Citations and explanations:		
As per claims 12 and 25, Akutsu further discloses refusing to accept subsequent data items for a predefined time period responsively to detecting a failure in caching the data items in a disaster-proof storage unit (see para [0156]-[0158], [0653]-[0659]).		
As per claims 13 and 26, Akutsu further discloses wherein the data items are accepted from one or more software applications, and wherein refusing to accept the subsequent data items comprises: initially refusing to accept the subsequent data items for a first time period that does not disrupt the software applications (see para [0246]-[0253]); and responsively to an assessed cause of the failure, continuing to refuse to accept the subsequent data items for a second time period that is longer than the first time period (see para [0246]-[0253]).		
Claims 1 - 26 have industrial applicability as defined by PCT Article 33(4) because the subject matter can be made or used in industry.
